

INTERNAL REVIEW · [QUARTER / YEAR]

Incident response, last quarter.

What broke. How long it lasted. What we changed — and what remains.

01 / THE QUARTER

Start with the impact.

[#]

incidents

[TOTAL]

total outage time

[#]

fixes shipped

Replace every bracketed field with verified incident data.

02 / OUTAGE REGISTER

What went down, and for how long?

INCIDENT	WHAT BROKE	DURATION
01	[Service / failure]	[hh:mm]
02	[Service / failure]	[hh:mm]
03	[Service / failure]	[hh:mm]

Add or remove rows to match the quarter’s incident count.

03 / FAILURE PATTERN

What broke underneath?

[Verified recurring cause or failure pattern]

Evidence: [incident IDs, systems, or observable signal]

04 / INCIDENT DEEP DIVE

[Incident name]: the failure chain.

[Trigger]

[Failure]

[Customer impact]

Outage: [hh:mm] · Detection: [how / when] · Recovery: [how]

05 / RESPONSE

Where did response time go?

DETECT

[time to detect]

MITIGATE

[time to mitigate]

RESTORE

[time to restore]

[One concrete response bottleneck or lesson]

06 / FIXES SHIPPED

Three changes are live.

01 [Fix shipped]
[Incident / failure addressed]

02 [Fix shipped]
[Incident / failure addressed]

03 [Fix shipped]
[Incident / failure addressed]

07 / FIXES SHIPPED

What changed in practice?

BEFORE

[Failure or response gap]

NOW

[New protection or capability]

Proof it works: [test, alert, drill, or observed result]

Open work has an owner and a date.

[P1]	[Remaining risk or task]	[Owner] · [Due date]
------	--------------------------	----------------------

[P2]	[Remaining risk or task]	[Owner] · [Due date]
------	--------------------------	----------------------

[P3]	[Remaining risk or task]	[Owner] · [Due date]
------	--------------------------	----------------------

09 / NEXT QUARTER

Close the loop.

[The one response capability we must improve next]

Decision needed: [specific approval, trade-off, or commitment]
